Navigating ASSP's New Safety Training Standard

AMERICAN SOCIETY OF SAFETY PROFESSIONALS

Ensure Compliance, Strengthen Site Safety

With the release of the American Society of Safety Professionals (ASSP) new safety training standard, ANSI/ASSP A10.2-2025, organizations in construction and demolition must rethink how they deliver, track, and validate safety training. It's time to digitize compliance and protect everyone on-site.

What You Need To Know:

The new standard emphasizes:

1. Training contractors before they begin working on-site
2. Ensuring contractor training materials are understood and acknowledged
3. Making safety documentation accessible and easy to verify
4. Facilitating communication around site-specific hazards

This ultimately results in a safer, more compliant work environment from the moment someone enters your site.

FacilityOS Modules That Help You Stay Compliant

VisitorOS

Ensure Document Compliance
Customize the visitor sign-in experience to include required documentation like NDAs, quizzes, or safety inductions.

Track Acknowledgements Automatically
Automatically collect and store signed forms and training completions for each contractor—creating an auditable trail that aligns with ASSP recommendations.

Ensure Only Trained Individuals Gain Entry
Prevent access to those who haven't completed mandatory training, reducing the likelihood of safety incidents or compliance gaps.

ContractorOS

Centralize Contractor Documentation
Collect, organize, and validate contractor training certifications, site-specific safety materials, and documentation all in one place.

Monitor Compliance in Real-Time
Get instant visibility into contractor and vendor compliance statuses. Easily identify who's missing key documentation or certifications and prevent site access accordingly.

Build a Safer Work Environment

With ASSP A10.2-2025 now in effect, it's critical to ensure your training and compliance processes are proactive—not reactive.

FacilityOS gives you the tools to ensure everyone on-site is prepared. Reach out to our team today to learn how we can help you meet the new ASSP safety training standard.
